

SENIOR JAVASCRIPT DEVELOPER (FRONT-END & NODE.JS, AMONG OTHERS)

Insatiable curiosity, critical thinking and intellectual charity: serving tools that perform, and humans who matter.

Skills

Advanced	JavaScript Mobile first	Vanilla JS Markdown	HTML(5) NodeAtlas	CSS(3)	Stylus	Responsive Web Design	
Proficient	MySQL Sublime Text	Vue.js Remote work	jQuery Nuxt	Git Critical thinking	Print/PDF render	Node.js	Vuetify
Intermediate	RESTful JSDoc	Express.js PHP	Generative AI Photoshop	AngularJS Audacity	Less Canva	SASS	Bootstrap
Moderate	D3.js Server	NoSQL Quasar	Cursor Holacracy	Visual Studio Code	SVN	C#.NET	SQL
Emerging	Data science Go	AI Orchestration	Svelte	React	Angular	Python	Rust

At a Glance

Latest Positions

- FULLSTACK DEV / CTO
at Impaakt
- FULLSTACK JS DEV / CO-FOUNDER
at Orchard ID
- FRONT-END DEV / BACK-END NODE.JS
at Knowledge Expert
- FRONT-END JAVASCRIPT DEV
at MediaWelcome

Education (Master's Level)

- MASTER PRO M2I, ITIN-ESCIA
- DUT R&T (HND EQUIV.), University of Savoie
- BAC S (A-LEVELS EQUIV.), Lycée Paul Langevin

Experience

CTO / Lead Dev. / Fullstack JavaScript Dev.

Impaakt CH-1228 Plan les Ouates (GE), Switzerland

Team collaboration on development processes and technologies used.

- Leading the internal team: **on-site/remote/80%**.
- Leading **international external teams** in full remote.
- Internship **mentoring**.

Development and maintenance of the SaaS *Sustainability Report*: web application for double materiality assessment processes to provide graphs and sustainability reports based on data collected from companies, their clients, and stakeholders.

- Front-end MVVM **Vue 3** for navigation.
- Back-end SSR **Nuxt 3** for App/RESTful API.

Prototyping of a calculator *How Sustainable to Me*: application to guide your sustainability investments based on your own convictions.

- Full-stack MVVM/SSR **Quasar** for the application.
- NoSQL-database **RxDB** for local DB.

Development and maintenance of the community project *Impaakt*: web application to rate companies on their participation in the 17 Sustainable Development Goals.

- Front-end MVVM **Vue 2** for navigation.
- UI/UX Front-end Kit **Vuetify 2** for UI/UX.
- Back-end SSR **Nuxt 2** for content management.
- Back-end MVC2 **Laravel** for RESTful API.
- SQL-database **MySQL** for remote DB.
- Graphical rendering **D3.js** for data processing.
- Puppeteer **Node.js** for PDF generation.

2025

Post-studies and projects

>Musical Creation with Suno

Writing lyrics and poems and setting them to music using the composition and interpretation tools of the Generative AI Suno.

2024

- Argumenta Pro Melodiam*
Creation of an AI-bum where music thinks, doubts, and blends critical thinking, humanity, and sonic poetry.
- Insert song: Sung adaptations*
Translation-adaptation of various music from games, films, ads and series.

2023

Use of Generative AI

Using generative AI for self-training, content creation, and project quality improvement including AIs available in Mammouth AI.

- Creation of YouTube thumbnails, MP3 cover art.
- Code improvement with Cursor, Copilot, and Claude.
- Improving interactions with AIs.
- Continuous watch on generative AIs, their use, and impact.

2022

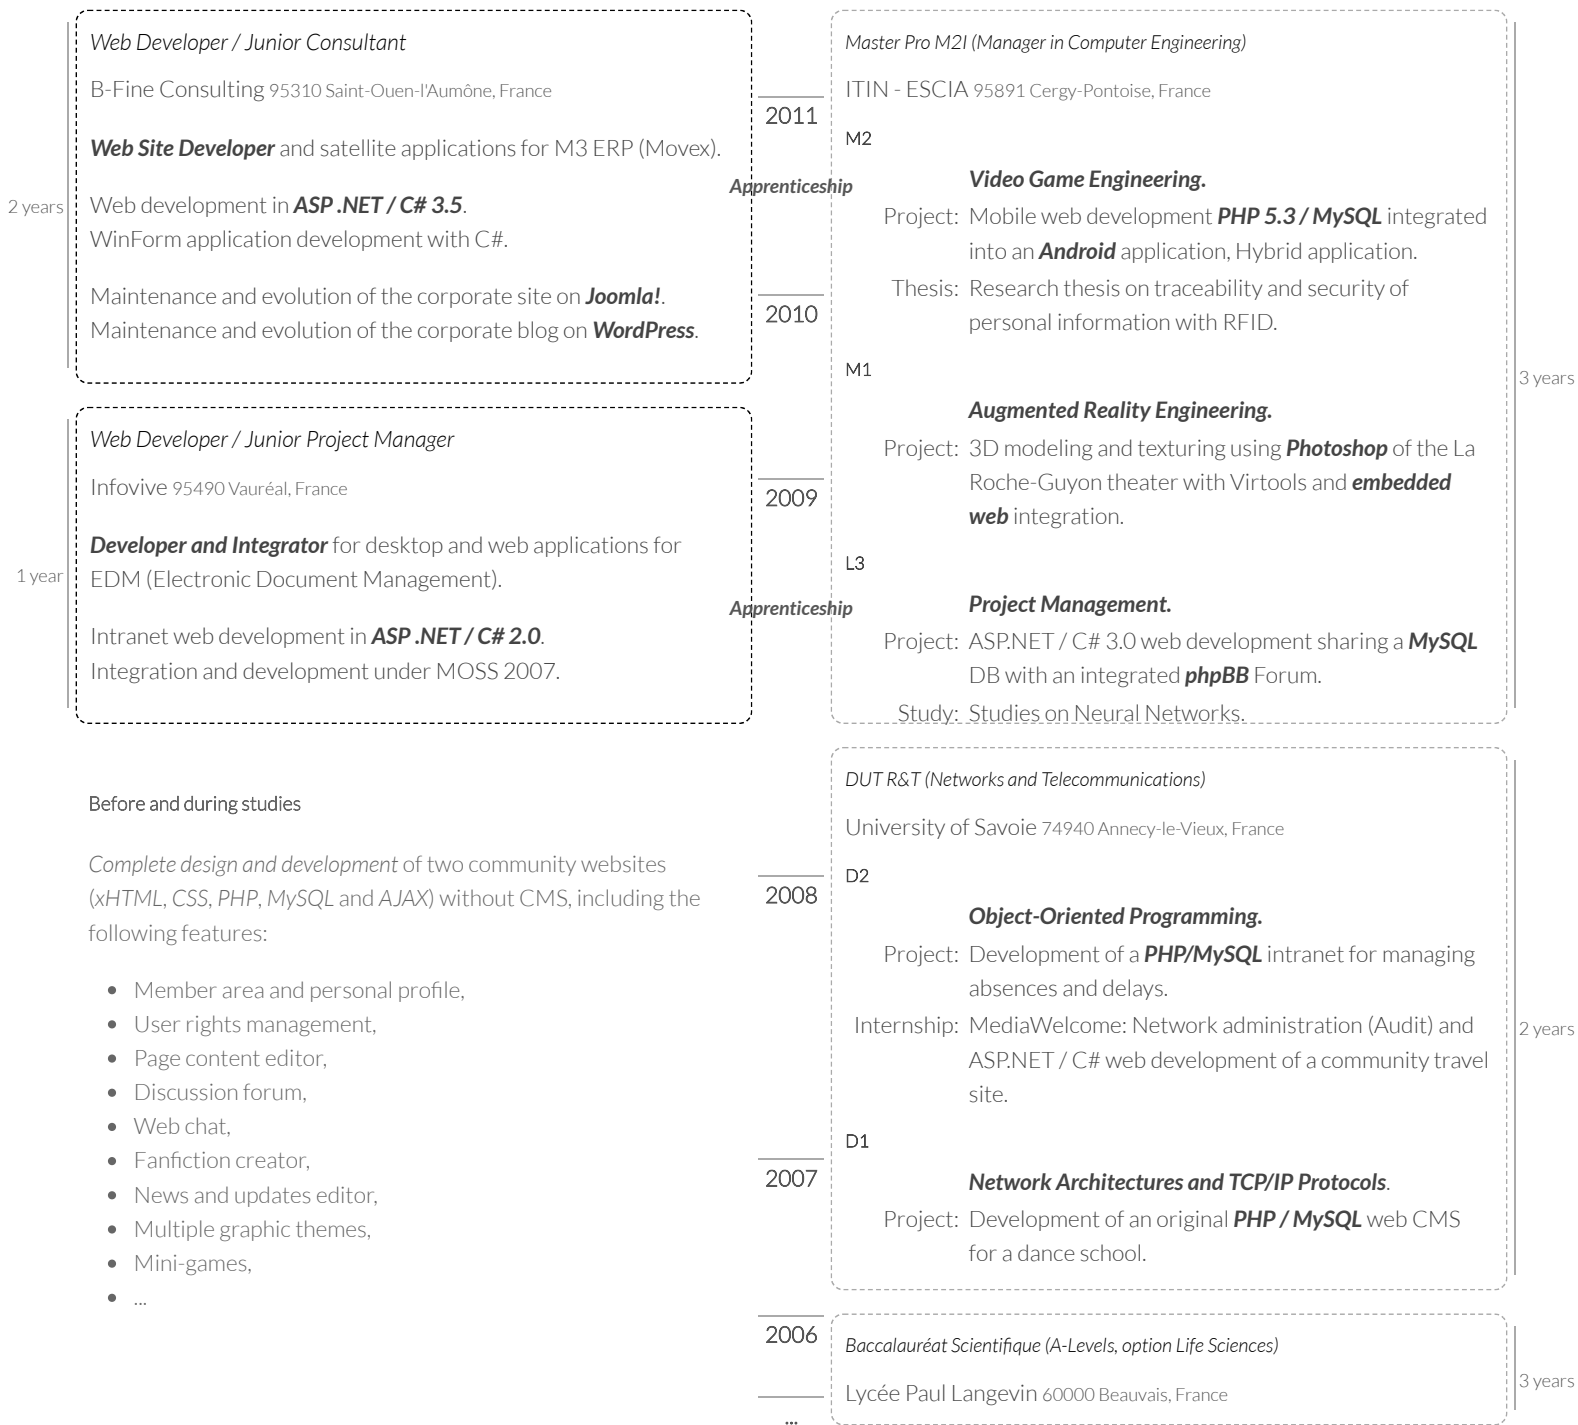

Critical Thinking

Study of critical thinking and the scientific method with the tool *Zététique* (Skepticism) and daily practice via the *Zetetique.wiki* project.

- Daily automated skeptical news,
- Introductory videos,
- Video courses from professionals,
- Creation of summary sheets

2021

9 months	Fullstack JavaScript Developer / Lead Developer Amétis 74000 Annecy, France Development and maintenance of the community project <i>Impaakt</i> : web application to evaluate companies on their contribution to the 17 Sustainable Development Goals.	2020	Coop Collaboration Discovery and trial of collaboration in a Coop (worker cooperative) with the <i>company Amétis</i> offering a plurality of services in various fields.
	Fullstack JavaScript Developer / CTO Orchard ID 35000 Rennes, France Development and maintenance of the community project <i>Impaakt</i> : web application to evaluate companies on their contribution to the 17 Sustainable Development Goals. Implementation of a full-stack JavaScript / Node.js workflow covering the entire cycle, from development to production. - Front-end MVVM Framework Vue for UI/UX. - Back-end SSR Framework Nuxt for App/RESTful API. - Back-end MVC2 Framework NodeAtlas for Site/Web API. Refactoring from legacy tools like AngularJS , jQuery or monitoring technologies like PHP or MySQL .	2019	Business Creation Co-creation of the <i>company Orchard ID</i> and implementation of a philosophy of sharing and equality with company steering based on the desire and well-being of its employees rather than on objectives set by management.
2 years 10 months		2018	Blogging Publishing posts on <i>personal blog</i> or on <i>other platforms</i> like <i>Developpez.com</i> . Translations of posts on <i>Medium</i> . Technology watch via social networks.
		2017	Nuxt Participation in the official French translation of Nuxt 2 . Translations of various documentation pages. Vue Creation and management of the official French translation team for Vue 2 on Github . Translations of various documentation pages. Vanilla JS Complete documentation and Benchmark of Vanilla JS compared to jQuery for developing in native JavaScript.
2 years 8 months	Web Integrator / Node.js Developer Knowledge Expert CH-1227 Carouge (GE), Switzerland In charge: HTML5/CSS3 creation based on wireframes, style guides or PSDs. UI creation with Vanilla JS , jQuery or AngularJS . Development of 2D web games Canvas and Matter.js . Development of web productivity tools with Node.js . Technology watch and documentation of Front-end techniques in Markdown . SEO , W3C and ECMAScript recommendations and implementation. Support: Front-end integration with Aurelia.io in ES6 . Front-end integration with ASP MVC5 Razor and Bootstrap . Development of Facebook applications in PHP with CodeIgniter . Management of remote work and planning tools.	2016	Node.js Creation of NodeAtlas , an engine for MVC2 architecture for HTML assets, websites or real-time web applications. Stack: <i>ExpressJS</i> , <i>EJS</i> , <i>Socket.io</i> , <i>commander</i> , <i>mongoose</i> , etc. Sharing on GitHub.
		2015	Mobile First Architecture Creation of Front-end responsive structures oriented <i>Mobile first</i> , multi-browser with <i>fallback</i> for old browsers (<i>Modernizr</i>) and <i>Websocket</i> / <i>AJAX</i> exchange.
1 year 4 months	Web Integrator / Node.js Developer MediaWelcome 74000 Annecy, France Technical Lead on Web 2.0 architecture, client-side and server-side. jQuery plugin development for rich interfaces. Cross-domain development with cookie management. Team upskilling in HTML5 and CSS3 . Migration of an ASP .NET / C# 2.0 web solution to 4.0. Web development in ASP .NET / C# 4.0 and Linq . Drupal integration and theming. Maintenance and evolution of MediaWiki documentation.	2014	Performance and SEO Image optimization (<i>sprite/base64</i>), CSS minification, JS obfuscation, compliance with W3C standards, parallel loading under <i>Apache</i> environment.
		2013	PHP Development of an MVC2 architecture, with personal PHP 5.4 Framework, oriented <i>Front-End (HTML5/CSS3/JS)</i> : multi-platform, browser interoperability, multilingual, multi-template, print, real-time editing...
		2012	Avatar Community <i>Avatar Community</i> is a community platform halfway between a <i>website</i> and a <i>forum</i> . It allows exchange around James Cameron's Avatar universe. Compilation of FFVII Compilation of Final Fantasy VII is a community site around the Final Fantasy VII universe. This site gathers a large number of texts and information on the Compilation of Final Fantasy VII, directly from <i>Japan</i> and in French.

- *Cisco Certified Network Associate level 1 & 2 (University of Savoie, 2008)*

About me

I am a web developer specializing in JavaScript between Annecy and Geneva, living my passion every day, swimming among current and future techniques regarding Vanilla JS or Vue.js front-end user interfaces, Node.js development, and web and AI technologies. That's why every day at breakfast (but not only), I prepare something to satisfy my hunger for Responsive Web Design, web performance, respect for standards, best practices, POC HTML5 / CSS3 / ES6+, web accessibility, factorization, automation, sharing, puzzles of all kinds, generative AIs, and this through increasingly appetizing projects and prototypes.

Latest big dish? Daily work to use the best tools at my disposal for acquiring the most parsimonious knowledge possible as well as self-work to produce the most charitable judgments regarding objectifiable reality. You can find the compilation of this work on my site *<https://www.zetetique.wiki/>*.

You can find me on LinkedIn during my watch hours to talk about: design, development, integration, ergonomics, optimization, performance, SEO, web, AI, tech, sustainable development, or even critical thinking and video games!

... more details on *<https://www.lesieur.name/a-propos/>*.

What entertains me

- Understanding why LOST ended like that,
- Cultivating problems based on solutions,
- Singing over TV theme songs,
- Doing R&D lost in my browser tabs,
- Rolling around in Heelys,
- Typing non-breaking spaces using the Bépo layout,
- Summoning my critical thinking (is anybody home?)
- Running marathons on Codesignal,
- Being eco-friendly when it suits me,
- Escaping unfortunate incidents with a loaded die,
- And lots of other Unknowns... and Vice & versa.
